## Waste Site Reclassification Form

<b>Date Submitted:</b> 6/2/2004	<b>Operable Unit(s):</b> 200-UR-1	<b>Control Number:</b> 2004-075
<b>Originator:</b> M. E. Compau	<b>Waste Site ID:</b> 200-W-54	
<b>Phone:</b> 372-8711	<b>Type of Reclassification Action:</b> <b>Rejected:</b> <input checked="" type="radio"/> N/A <b>No Action:</b> <input type="radio"/> <b>Interim Closed Out:</b> <input type="radio"/> <b>Closed Out:</b> <input type="radio"/>	

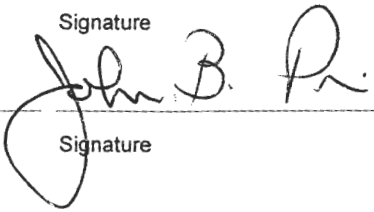

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

This reclassification form has been prepared to reverse the consolidation of 200-W-54 into 200-W-96 (Waste Site Reclassification Form 2002-038). The contamination zone associated with the 200-W-54 unplanned release extends from the western boundary of the 241-S/SX/SY tank farm eastward to the 216-S-19 crib. At its greatest extent, the boundary for the release is more that 200 meters from the edge of the tank farm fenceline.

**Basis for reclassification:**

200-W-54 extends a significant distance from the boundary of the 241-S/SX/SY tank farm. The 200-W-96 waste site was created to represent contaminated soil within the tank farm boundary. Because the 200-W-54 site extends so far from the tank farm, it should be treated as a separate, distinct waste site. The Rejected (Consolidation) reclassification of 200-W-54 into 200-W-96 should be cancelled and the classification returned to Accepted.
